# PRATIQUE PRTQ

## Real Value Meets the Future

Pratique (PRTQ) is an AI-supported Web3 platform combining Real World Assets (RWA) with the digital world. Our goal is to build a secure, transparent, and intelligent ecosystem.

Today, there is still a huge disconnect between digital and physical assets.

Pratique fills this gap by bringing real-world assets such as real estate, artwork, and licenses to the chain with Web3 technologies. Our AI infrastructure makes complex processes such as investment, analysis, and risk management simple and intelligent for the user. The PRTQ token is used both for transactions within the network and for governance. With a community-driven model, our users are not only consumers, but also guiding actors.

With Pratique, we tokenize real-world assets, making them accessible, fragmentable, and liquid. In this way, we are building a future where everyone has fair access to great investment opportunities. This infrastructure, powered by artificial intelligence, sets a new standard in the industry with fraud prevention, automatic verification processes, and dynamic analytics. PRTQ is where the digital world intersects with the real world.

## Token Information

Token Name: Pratique

Symbol: PRTQ

Total Supply: 1,000,000,000

Blockchain: Binance Smart Chain (BSC)

Decimals: 18

Contract: 0xD23aa42a56D582BA865b1124665D2d4A8Fc0D0b7

# ROADMAP

## Q1 2025 - Basic Preparation Process

- Creating the project idea
- Determining the team structure and assignment
- Conducting technical infrastructure research
- Completing the competitor analysis
- Clarifying the target audience

## Q2 2025 - Design and Preliminary Development

- Preparing UI/UX designs
- Designing the homepage and subpages
- Mobile compatibility developments
- HTML/CSS coding
- Receiving the first demo release
- Making domain name and server plans

## Q3 2025 - Development and Testing Phase

- Installing backend systems
- Integrating API connections
- Conducting security tests
- Transitioning to beta release
- Collecting feedback from users
- Airdrop organization
- Token printing process

## Q4 2025 - Token and Launch Process

- Website update
- Roadmap update
- Token pre-sale period (with different price ranges)
- DEX & CEX listings
- Global stock market listing
- Pratique stock market application installation

# OUR TEAM

The Pratique project is being developed by an experienced and expert team. Our team members, each skilled in various disciplines, work in a coordinated manner to ensure the project's success. We have established a strong synergy across software, blockchain, design, and marketing. We have a people-focused team spirit to ensure a reliable, transparent, and sustainable structure.

# WHITEPAPER

The PRTQ Whitepaper details our project's vision, technological infrastructure, and token economy. It explains the integration of Real World Assets (RWA) and AI-powered Web3 solutions. You can easily access the whitepaper and security audit documents in PDF format from the links below. Transparency and sustainability are our top priorities for our investors.

## FAQ

The PRTQ FAQ section provides clear and understandable answers to our investors' most frequently asked questions. From wallet connection and security to pre-sale and token usage, all the details are covered here. This section allows you to learn more about the project and quickly find a summary of the distribution process.

### What is PRTQ?

PRTQ is a Web3 based platform integrating AI and Real World Assets (RWA) to offer secure, decentralized financial solutions. It provides transparency, sustainability, and accessibility for investors through smart contracts and tokenized systems.

### How to buy PRTQ?

You can buy PRTQ tokens by connecting your crypto wallet (like MetaMask) to our official website. On desktop, visit the site and connect your wallet. On mobile, use the MetaMask DApp browser to open our site, connect your wallet, select the amount, and confirm the transaction. PRTQ tokens will be sent directly to your wallet.

### Is PRTQ safe?

Yes, PRTQ is built with security and transparency in mind. Our smart contracts are audited by independent firms, and all transactions are handled securely through blockchain technology. Investor safety is our top priority.

### What should I do for the PRTQ airdrop?

To participate in the PRTQ airdrop, a campaign will be launched on \*Gleam.io\*. Participants who complete all the tasks correctly will earn a chance to receive airdrop rewards. Additionally, various airdrop events will be organized over time to give more users the opportunity to join.
